

I GREEN INNOVATIONS, INC. Files Patent for METHOD OF PRODUCING COMPOSITE RECYCLED BOTTLE SHEET PRODUCTS Made From Recycled Plastic

B Green Innovations, Inc. plans to create products from the compressed flat composite recycled bottle sheets so as to retain the visible display of the of deformed identifiable bottles.

B Green Innovations, Inc. Continues to Attract Re-Sellers, With Partners Nationwide and Canada Selling its “Green” “VibeAway” & “ECOPOD” Products

MATAWAN, N.J.--(BUSINESS WIRE)-April 1, 2009- B GREEN INNOVATIONS, Inc. (OTC Bulletin Board: IVOT), a wholly owned subsidiary of I Green Innovations, Inc., announced today that it had Filed Patents for METHOD OF PRODUCING COMPOSITE RECYCLED BOTTLE SHEET PRODUCTS, made From Recycled Plastic, the Company will be filing for several additional patents in the near future.

The invention relates generally to a method of producing composite recycled bottle sheet products from recycled plastic bottles. The sheets are used to create products that display the individual deformed bottles in a recognizable manner. B Green Innovations, Inc. plans to create products from the compressed flat composite recycled bottle sheet so as to retain the visible display of the plurality of deformed identifiable bottles.

B GREEN INNOVATIONS, Inc., intellectual property will help combat large problem by manufacturing certain consumer products from recycled plastic. The markets are significant, and largely untapped at the moment. Plastics play an important role in almost every aspect of our lives. Plastics are used to manufacture everyday products such as beverage containers, household items, and furniture.

According to the EPA In 2007, the United States generated almost 14 million tons of plastics in the MSW stream as containers and packaging, almost 7 million tons as nondurable goods, and about 10 million tons as durable goods.

Continuing its Mission: “Recycling the planet one product at a time.”

About B Green Innovations:

B Green Innovations, Inc. ("B Green") a Matawan, New Jersey-based Corporation is dedicated to becoming a "green" technology company, focused on acquiring and identifying promising technologies that address environmental issues. The first technology will be used to create new products from recycled tire rubber. Recently, we announced that we had filed a new Patent Application for a process it described as "paver blocks and patio blocks made from recycled tire crumb rubber". B Green Innovations, Inc. has also filed 3 additional patents on products made using 100% recycled tires.

Certain information included in this press release, may contain forward-looking statements about our current and expected performance trends, growth plans, business goals and other matters. These statements may be contained in our filings with the Securities and Exchange Commission, in our press releases, in other written communications, and in oral statements made by or with the approval of one of our authorized officers. Information set forth in this press release contains various "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The Private Securities Litigation Reform Act of 1995 (the "Act") provides certain "safe harbor" provisions for forward-looking statements. The reader is cautioned that such forward-looking statements are based on information available at the time and/or management's good faith belief with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in the statements. Forward-looking statements speak only as of the date the statement was made. We assume no obligation to update forward-looking information to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information. Forward-looking statements are typically identified by the use of terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "might," "plan," "predict," "project," "should," "will," and similar words, although some forward-looking statements are expressed differently. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct.
